

- 1) A collection of web pages -> Website
- 2) A collection of Website -> World Wide Web
- 3) URL stands for -> Uniform Resource Locator
- 4) State TWO (2) differences between HTTP and HTTPS.

HTTP	HTTPS
No authentication.	Uses SSL certificates to verify website identity.
It is insecure because plain text is sent, making it vulnerable to hackers.	It's safe because it sends encrypted data that hackers can't decipher.

- 5) State TWO (2) differences between static website and dynamic website.

Static Website	Dynamic Website
Web pages are prebuilt source code.	Web pages are not prebuilt source code.
Displays the same information to all visitors.	Allow to create a user profile.
